Breaking Boundaries at the Bottom of the World

Falkland Islands — South Georgia — Elephant Island — Western Antarctic Peninsula — Polar Circle

Embark on a life-changing, 24-day journey to one of Earth's most remote and breathtaking regions. And meet at least six species of penguins along the way...

During February 14 to March 10, 2026, Sea Women Expeditions (SWX) will assemble an extraordinary team of 25 explorers to travel to the Bottom of the World—the Falkland Islands, South Georgia Island, Elephant Island, the Western Antarctic Peninsula, and the Polar Circle.

In partnership with BlueGreen Expeditions, SWX will provide a platform for Indigenous and non-Indigenous women and non-binary, two-spirit, and gender-diverse explorers to develop leadership skills and gain ocean research experience in one of the harshest climates on Earth.

Calling for Team Members

Answer our call to join (and help shape) SWX's leadership and arts programs and our ocean research and dive & snorkel expedition to the Southern Ocean aboard Oceanwide Expeditions' M/V Hondius, the world's first-registered Polar Class 6 vessel built from the ground up for expedition cruising.

During this 21st century polar expedition, we'll bring together a world-class lineup of international experts across the STEAM (science, technology, engineering, the arts, and mathematics) fields. We'll conduct pioneering ocean research, immersing ourselves in polar waters and participating in a unique leadership program that merges the arts and the sciences.

Early-, mid- and late-career team members are welcome.

SWX is seeking oceanographers, scientists, engineers, visual and performing artists, geographers, historians, researchers, writers, educators, journalists, business leaders, underwater videographers and photographers, remotely operated vehicle (ROV) pilots, and medical and scuba diving professionals to contribute their skills and expertise to create a diverse and collaborative team of 21st century polar explorers.

In partnership with Blue Green Expeditions and Oceanwide Expeditions, SWX will work alongside dive masters who have extensive experience in Antarctic scuba diving and snorkeling operations.

Ocean Research

The Western Antarctic Peninsula is a highly productive marine ecosystem that has experienced extended periods of change since the 1950s, in the form of 3°C warming, glacier retreat, reduction of sea-ice cover, warming of the surface ocean of 1°C warming, and shifts in marine populations, among others.

Backed by scientific permits and in collaboration with university partners, SWX's ocean research will include sea water sampling for eDNA analysis, zooplankton and phytoplankton studies, and invertebrate zoological investigations.

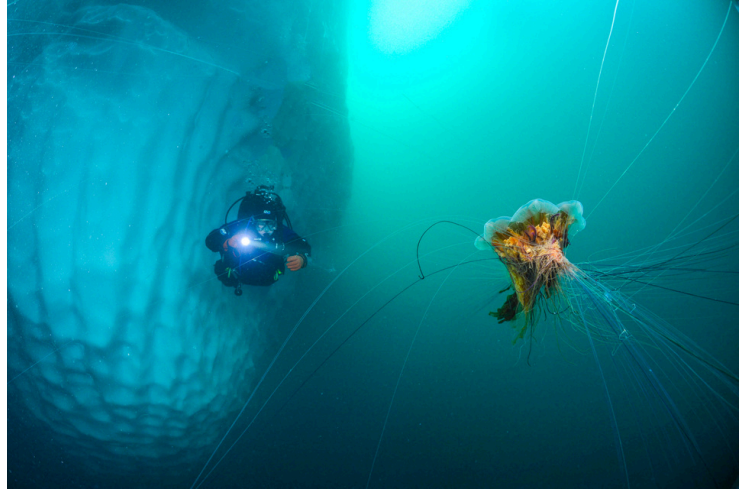

Each STEAM participant will have the chance to contribute to valuable environmental research while building lasting connections at the Bottom of the World.

Breaking Boundaries

This is more than an expedition—it's an opportunity to break boundaries, gain unparalleled leadership skills in the field, and to inspire global change. Together, we can create ripple effects around the planet.

Join us, for an Antarctic journey that will leave you forever transformed...

To apply to become a member of this STEAM team exploring the Bottom of the World, please send your biography and resume to us at info@seawomen.com

INCLUSIONS

- 2 nights hotel stay in Ushuaia, Argentina, Feb. 14 & 15
- Sea Women's Leadership Program, Feb. 15 & 16
- Welcome logistics orientation, evening of Feb. 15
- Sea Women's Arts & Sciences programs pre-departure team meetings, Feb. 15 & 16
- 22 nights aboard M/V Hondius, part of the Oceanwide Expeditions polar fleet
- All meals aboard M/V Hondius
- Shore excursions, lectures, and experienced polar guides provided by Oceanwide
- Scientific permits for water sampling, plankton collection, and invertebrate studies for Antarctica
- Scuba diving & snorkeling activities managed with Blue Green approved divemasters. Sea Women's team are the only in water participants aboard M/V Hondius
- Waterproof expedition jacket
- Pre-expedition logistical support from Blue Green
- From Blue Green, Nancy McGee, explorer and diver, is participating in expedition and is available to provide photographic support
- Pre-expedition development of Arts & Sciences and Leadership programs led by Sea Women
- From Sea Women, co-leaders Susan R. Eaton, Canadian earth scientist, polar explorer, and snorkeler, and Sarah Neill, British marine biologist, diver, and lecturer
- Sea Women's Arts & Sciences and Leadership programs during the expedition aboard the M/V Hondius
- Drysuit rental for snorkelers, including hoods and gloves
- Weights for scuba diving and snorkeling; Diving tanks for scuba divers
- Use of Oceanwide rubber boots and snowshoes
- NOTE: Itinerary: subject to change depending on weather, etc.

EXCLUSIONS

- International and domestic flights to and from Ushuaia (USU), Argentina
- Land arrangements other than mentioned above, meals ashore
- Gratuities
- Possible fuel surcharges from Oceanwide
- Alcohol and bar charges ashore and aboard the M/V Hondius
- Required Diver/Snorkeler Insurance (including evacuation insurance)
- Travel and Trip insurance - Strongly Recommended
- All dive gear for scuba divers except tanks and weights

PRICING

Paid to Blue Green Expeditions

Quad Porthole - \$20,200

Twin Porthole - \$24,300

Twin Window - \$25,500

Twin Deluxe - \$27,500

Superior - contact us

Non-refundable deposit \$4,000pp

2nd Payment of \$4,000pp due Jan. 16, 2025

3rd Payment of \$8,000pp due June 16, 2025

Balance due Oct. 16, 2025

All prices shown in US dollars, per person, and based on double occupancy (or four in a quad)

Paid to Sea Women Expeditions

Non-refundable deposit \$800 (Arts & Sciences and Leadership programs)
