Blue Green Expeditions is headed to one of the most enchanting place on earth, Galapagos. These remote islands off the coast of Ecuador are nature's evolutionary laboratory and perfectly situated between the ocean currents to create a diverse ecosystem unlike any other. The archipelago contains more distinct species of flora and fauna than any other place on earth! Our longer and custom itinerary gives us the time to explore more remote islands looking for unique animal behaviors and interactions. While this is not prime whale shark season, there are plenty of shark opportunities with hammerheads, Galapagos sharks, and white tips as well as seals, mola molas and many other big animals. Blue Green Expeditions is adding an optional land tour at the end of the trip. We will stay onboard the m/v Aqua while visiting the unique and fascinating wildlife of the Galapagos archipelago. As an added value, Blue Green Expeditions is taking care of many of the logistics of this trip by incorporating the domestic flights, the hotel in Guayaquil on December 5th and all the transfers to and from the airport, hotel and the boat in the cost. Let us make your experience in the Galapagos a smooth hassle free journey that you will never forget!
