

Maldives

March 18 - 27, 2021

Blue Green
Expeditions

Blue Green Expeditions is headed to the Maldives! This is one of our favorite destinations with mantas, whalesharks, turtles, octopus, large schools of fish, beautiful anemones and clownfish, healthy hard and soft corals, and enough variety and quantity of marine life to rival any place in the world. The unique habitat of the Maldives act as a magnet for exuberant marine life. The emerald islands, ringed with coral and numbering more than 1,190 in the archipelago, house species that run the gamut from blooming corals to big pelagics. It's not simply the variety and drama of the species but also their sheer numbers that will astonish you. Friendly encounters with fish in the thousands, from the tiniest to the tremendous, are common experiences on the varied dive sites. Paul began traveling there over 25 years ago and loves going back to the Manthiri with the most experienced crew in the Maldives. Guests will enjoy the beauty of the Maldives aboard the Manthiri while the diving is done off the large dhoni that holds the compressor and the dive gear. With only 12 guests and 11 crew, you are guaranteed personalized attention and limited divers underwater for a truly incredible experience!
