Join Blue Green Expedition as we journey to one of the most beautiful resorts in the Caribbean, Anse Chastanet. This one of a kind hotel in St.Lucia is part of a designated marine reserve protecting miles of colorful coral reefs teeming with tropical fish. The resort is set up for both beach and boat dives. The reef's remarkable ecosystem offers an amazing profusion of unusual tropical marine life. Anse Chastanet Reef which is home to more than 150 different species of fish makes for an amazing dive day or night. In the shallow areas be sure to keep your eyes open for peacock flounders, octopus, needle fish and turtles. Or drop down a little deeper over dense coral growth to see puffers, moray eels, parrot fish, lobsters and even sea horses. A unique dive site for all abilities and especially good for macro photography. Included is 12 boat dives where we will explore dramatic walls beneath the majestic Piton Mountains, Superman's flight, a drift dive in the shadow of the Petit Piton, Coral Gardens and Jalousie under the Gros Piton, Piton Wall, the wreck of the "Lesleen M", Anse La Raye and Anse Cochon and many other remarkable sites. A visit to St.Lucia would not be complete without exploring the islands unique habitats. The Sulphor Springs, Twin Pitons and tropical rain forest are all a short distance away from the resort. We hope you can join us!
