Join Blue Green Expeditions in this unique Alaskan adventure to dive and snorkel with Salmon Sharks! There are only 12 spots available to see this elusive cold water fish during the migratory season. During the week we will primarily focus on shark interactions which occur at specific times in the morning and during specific weather windows each day. After shark interactions, we will try to fit in 2 dives depending on how much time we spend with the sharks. We will be staying deep in the wilderness at the Ravencroft lodge on Prince William Sound. The lodge sits on 240 acres of private land surrounded by pristine national forest on all sides. After diving we will have the opportunity to look for topside wildlife. Possible animal sightings for this time period are black bears, brown bears, eagles, otters, sea lions, harbor seals, and various bird life. If that is not enough Alaska for you, we have the option of adding on 4 days of touring and Denali for an additional \$1699/person including hotels, tours, railroad transfer to Denali and bus tour return to Anchorage and some meals.
