

DIVE & EXPLORE GREEK ISLANDS BY SAILBOAT

3 Guided Trips: May 19-26 / May 26-June 9 / June 9-16, 2018

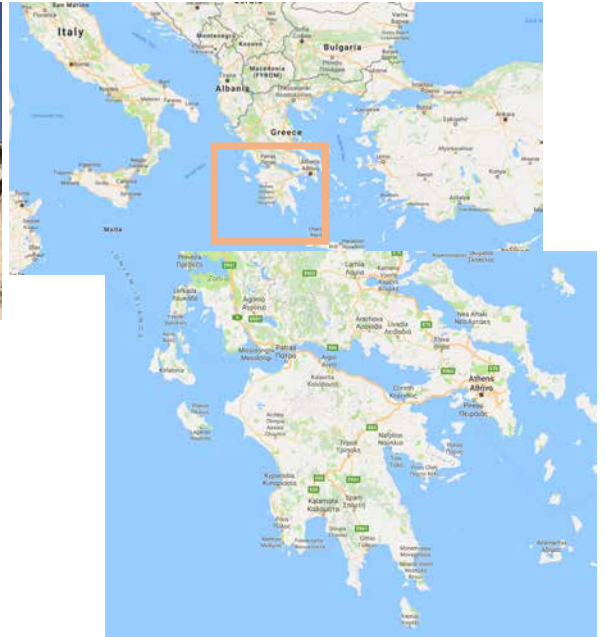

Greece is the birthplace of western civilization and has only recently been opened to divers! Join Blue Green Expeditions on one of 3 different itineraries for 2018 as you explore, at a leisurely and relaxed pace, the wonders of the Aegean and Ionian seas and the majestic Greek islands. The specially equipped catamarans of [Ulysses Multihull Adventures](#) will be your home and fully equipped floating dive center for the duration of your excursion. Ancient history, above and below the waves awaits!

Flexible Itineraries: You will set your itinerary on-site after looking at the wind, weather and sea conditions and discussing the types of diving you want to do and sights you wish to see. Your Captain and tour leader will offer suggestions and explain the options allowing you to create a truly customized vacation. Whether sailing or under power, you will enjoy the tranquility of being on the water with a front seat to spectacular sunsets. Most nights are spent nestled in a private cove while others will be in small ports, allowing for provisioning, onshore dining, window shopping and casual exploration of Greek culture. Arrive early or stay a little later and visit world famous archeological sites like the Acropolis and Parthenon in Athens, or the Oracle at Delphi. Pick a favorite Island like Santorini, Crete, Mikonos and sample the best that Greece has to offer.

Select from 3 trips in 2018: **1) May 19-26, 2018** - Embark/Disembark Athens and cruise the north and western Aegean. **2) May 26-June 9, 2018** - Embark Athens and take 2 weeks transitioning to the Ionian Sea via southern Greece.
