

Iceland

August 25 - September 4, 2019

Join Blue Green Expeditions in Iceland!! You will get to dive in one of the most unique dive sites on the planet, the Silfra fissure! Iceland has it all. From unique dive sites to amazing scenery, we will hike, dive, explore, soak in hot springs and enjoy the local culture. In Silfra, we will dive between two continental plates in the purest water in the world with up to 100m visibility. We will even have the chance to do a

night dive in Silfra! We will explore geothermal lakes and rivers and dive hydrothermal vents all while enjoying amazing top side scenery, fantastic food and the unique Icelandic culture. This unique diving tour of Iceland combines dazzling underwater experiences and breathtaking land excursions. Our explorations will take us from the capital of Reykjavik to southern Iceland where we will explore the rarely visited Westman Islands, which is home to hundreds of thousands

of puffins and do some hiking on a glacier.

From there we will continue along the ring road to the eastern part of Iceland experiencing picturesque glacial lagoons, amazing waterfalls and pristine landscapes. As we approach the north, we will see geysers, look for trolls and enjoy a spa visit. And then there is more diving! At Strytan Dive Center, Erlanger will share with us his favorite dive sites, rarely shown to outsiders, as well as have the opportunity to dive a hydro thermal vent, see the chimney and photograph the incredible life attracted to this ocean oasis. Joining us on this amazing journey will be Richard Salas, a professional photographer who will be conducting clinics on photography above and below the water.
