

Raja-Halmehera-Lembeh

July 1 - July 13, 2022

Blue Green Expeditions will be running a new transition trip in Indonesia with muck diving, coral reefs and Big Fish! We will be onboard the luxurious Raja Ampat Aggressor cruising from one beautiful location to the next! This off the beaten path itinerary includes the best of “the Coral Triangle”, the richest coral reef ecosystem in the world that contains at least 500 species of reef-building corals and additional species of soft and encrusting corals all contributing to the vibrant, rainbow of colors in the region's crystal clear waters.

Divers will experience warm shallow reefs with colorful reef fish and exotic invertebrates and, in the deeper waters, current-cooled seamounts, walls, and pinnacles with sharks and tunas. We start our dives in beautiful **Raja Ampat**. The sheer number and diversity of marine life seen here is amazing. We then move to the remote island of **Halmahera**. It is located between the Molucca Sea to the west and the Pacific Ocean to the east and has a unique geography with its four peninsulas enclosing three great bays and three volcanoes. Divers will find exciting dives with plenty of weird and wonderful creatures and pinnacles encircled by massive schools of barracuda and other pelagic fishes.

We will end our tour in **Lembah**, The muck diving capital of the world! Here lives the strangest and most bizarre sea creatures that are found in a density no where else on earth! Be on the lookout for the Blue Ring Octopus, Banded Sea Snakes, Giant Frog Fish, Pgymy SeaHorse and many many other species all which you can find in a single dive! This unique trip will only happen once a year and will sell out fast!

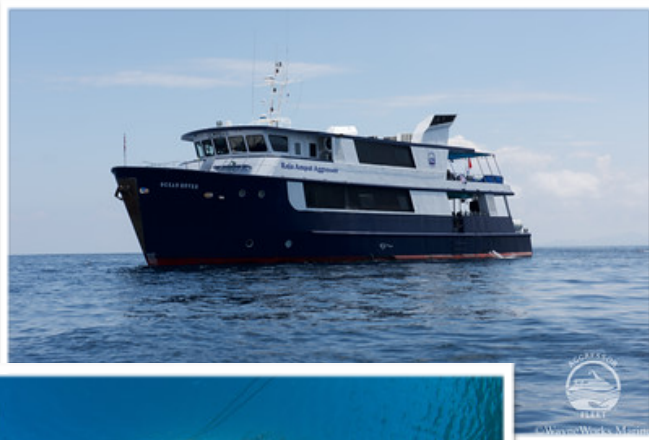

Price Includes:
